(54) Title: MASSAGING APPLIANCE FOR BATHS

(57) Abstract: The disclosed back scrubbing device for use without hands can be installed in baths and/or fitness centers as well as in sport clubs and similar facilities. The device allows the application of a detergent thereon and cleaning while massaging the body. The applied massaging pressure can be controlled individually by the pressure the user applies against the device. The device comprises a three-dimensional main body with upper and lower plane surfaces, a flat back with furrows (ridges or grooves for dropping off water) and a convex or doubleconvex front side having protrusions, the device further comprises connecting elements (tubular guide) for adjustably connecting it to a vertical rod or bar and fixing means for fixing it to different positions along the rod.
